# Arthur A Kennedy

Founder | Graduate Student | Enthusiast in Data Analytics and AI Solutions

Greater Minneapolis-St. Paul Area

## Summary

A highly motivated individual passionate about solving complex problems and working with talented teams pushing the frontiers of technology.

---

## Experience

### Dataplotic

Founder

March 2025 - Present (5 months)

I'm on a mission to make data accessible, usable, and collaborative.

Born out of challenges I faced during academic and research work, Dataplotic is being built to eliminate the bottlenecks in data teamwork. No more chasing teammates for updated charts or wrestling with overly complex platforms. From data analysts to researchers and stakeholders, Dataplotic brings greater clarity, speed, and collaboration to every data initiative.

As a technical founder, I'm currently building our MVP from the ground up, while intentionally stepping outside my comfort zone to learn the business side of things. I've been actively attending events like BETA Tuesdays, Minnebar, MinneAnalytics, Open Source North, and startup competitions and showcases at the University of St. Thomas and UMN to connect with fellow founders, industry mentors, product thinkers and potential users.

These experiences are not only sharpening my skills, but actively shaping both product vision and my growth as a founder.

Dataplotic is still in its early stages, but it's fueled by real-world needs, a growing network, and the belief that data deserves to be shared, seen and understood by everyone.

If you're interested in early access or just want to follow the journey, join the waitlist at <https://www.dataplotic.com>. I'd love your feedback!

## Freelance

Wordpress Developer

December 2023 - October 2024 (11 months)

Minnesota, United States

Dayton Rogers Mfg

Power Platform Developer

January 2021 - May 2021 (5 months)
